COMMENTS

Over the past decade, the number of persons aged 60 and over in Chicago decreased slightly from 517,318 to 516,223. However, because Chicago's total population decreased during the period of 1960 to 1970, elderly persons comprised 15.3% of Chicago's population in 1970 compared to 15.0% in 1960.

Of Chicago's 76 community areas, 46 showed an increase while 29 showed a decrease in their elderly population during the past decade. Generally, Chicago's Mid and Far North, Northwest, Far South, and Southwest sides showed an increased elderly population. On the other hand, the Central, West Southcentral, and Southeastern sides, for the most part, showed a decreased elderly population from 1960 to 1970.

Over the decade, West Ridge had the largest increase in number of elderly residents (+5,666). South Shore had the largest decrease in number of elderly residents (-4,528).

The elderly population in Ashburn more than doubled and showed the greatest percent of increase in its elderly population (117.9%). West Garfield Park showed the greatest percent of decrease (-53.0%) in its elderly population.

In 1970, as was the case in 1960, Uptown had the largest number (30,802) of elderly residents. Likewise, the Loop remained the community area with the highest concentration (29.6%) of elderly residents. For comparison purposes, a 1960 and 1970 list of the "top ten" community areas by number and percent of elderly residents follows.
